

Training in Networking

Introduction:

Switches, routers, and wireless access points are the essential networking basics. Through them, devices connected to your network can communicate with one another and with other networks, like the Internet. Switches, routers, and wireless access points perform very different functions in a network.

Objective: After attending the training, students should be able to understand

1. Learn network administration, architecture, infrastructure, troubleshooting.
2. Break into the IT industry by learning applied networking skills.

Program Details:

Training Program: Training in Networking

Resource Organization: NSIC

Date: 1/08/2016 to 12/08/2016

Students who can attend: B. Tech (ECE) 7^h Sem-2017 PO.

Feedback Analysis.

Report of Feedback Analysis:

Feedback for training was taken on 12th August 2016 with the 3rd year students (2017 PO). Analysis of feedback is listed below:

1. Duration of training should be increased then students will be able to understand more clearly.
2. Very good training session.

Training on CORE JAVA

Introduction:

Java is a high-level programming language originally developed by Sun Microsystems and released in 1995. Java runs on a variety of platforms, such as Windows, Mac OS, and the various versions of UNIX. This tutorial gives a complete understanding of Java. This reference will take you through simple and practical approaches while learning Java Programming language. This training is an introduction to Core Java. It starts with steps to install required software and editor. It has details of OOPS concept with detailed examples and great explanation. It covers important concepts of Core Java. It covers History of Java, Origin, Features of Java, OOPS, Array and Multidimensional arrays. What is class, Control structures, Object, Method and different types of constructor, String, Exception Handling and Collection Framework examples. Each topic is covered with detailed explanation and with examples.

Course Objectives: After the training program, students will be able to:

1. Understand fundamentals of programming such as variables, conditional and iterative execution, methods, etc.
2. Understand fundamentals of object-oriented programming in Java, including defining classes, invoking methods, using class libraries, etc.
3. Be aware of the important topics and principles of software development.
4. write a computer program to solve specified problems.
5. use the Java SDK environment to create, debug and run simple Java programs.

Program Details:

Training Program: CORE JAVA

Resource Organization: I & We

Date: 10.04.2017-14.04.2017

Students who can attend: B. Tech (ECE) 4th Sem-2019 PO.

Feedback Analysis:

REPORT of FEEDBACK ANALYSIS:

Feedback for training was taken on 14th April, 2017 with the 2nd year students (2019 PO). Analysis of feedback are listed below:

1. Duration of training should be increased then students will be able to understand more clearly.
2. Laptop table should be provided.
3. Online material should be provided for making clear the concept.
4. Sitting arrangements should be improved.

Training on Core JAVA

Introduction:

We must improve our basic knowledge to master in this field. Java is divided into two parts i.e., **Core Java (J2SE)** and **Advanced Java (JEE)**. The core Java part covers the fundamentals (data types, functions, operators, loops, thread, exception handling, etc.) of the Java programming language. It is used to develop general purpose applications. **Core Java** is the part of **Java** programming language that is used for creating or developing a general-purpose application. ... To develop general purpose applications. To develop online application and mobile application. Without **Core Java** no one can develop any advanced **java** applications.

Objective: After attending the training, students should be able to understand

1. The basic concepts of the Java programming language.
2. The core topics such as OOPs, inheritance, exception handling, etc.

Program Details:

Training Program: Core JAVA

Resource Organization: NSIC

Date: 01/08/2016 to 05/08/2016 and 08/08/2016 to 12/08/2016

Students who can attend: B. Tech (ECE) 5th Sem-2018 PO.

Feedback Analysis

Report of Feedback Analysis:

Feedback for training was taken on 12th August 2016 with the 3rd year students (2018 PO). Analysis of feedback is listed below:

1. Duration of training should be increased then students will be able to understand more clearly.
2. Sitting arrangements should be improved.
3. Due to problem of internet connection students faced difficulty to do their project work.

SILIGURI INSTITUTE OF TECHNOLOGY

DEPARTMENT OF CIVIL ENGINEERING

Report for the training on STAAD PRO conducted during 16/08/2016 to 02/09/2016 for 2017 pass out CE students.

Objective of the training: Students will be proficient in STAAD.Pro tool and able to perform different structural design and analysis case studies / projects.

Outcome of the program:

Students will be able to:

- Begin with basics and then move on to the professional tools.
- Effectively learn Bentley STAAD.Pro on account of learning paths and modules defined and developed by an industrial working professionals and Bentley Systems.

The program details are as below:

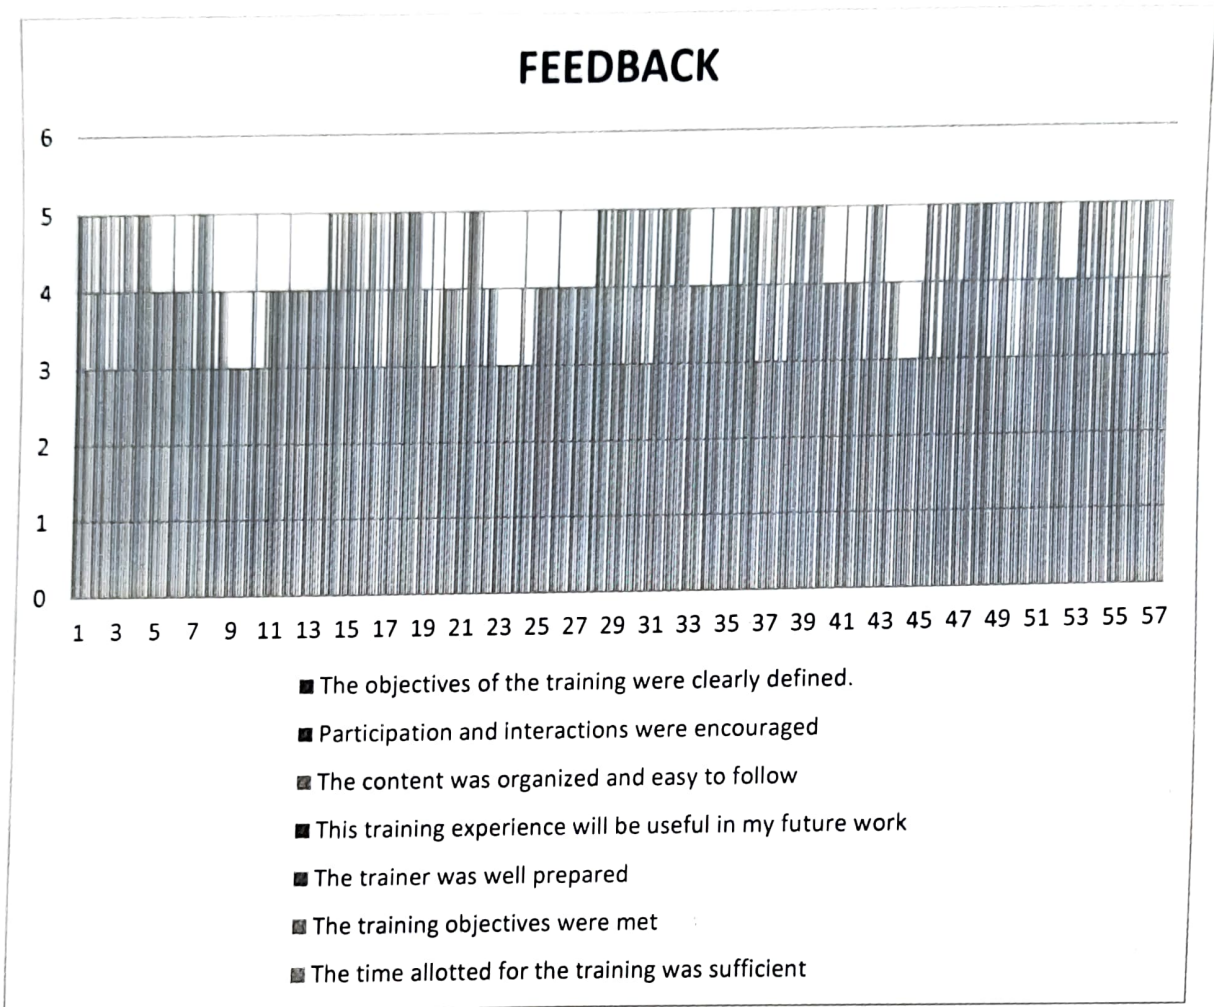

Title of training : STAAD PRO
Resource Organization: CADD Centre
Date : 16/08/2016 to 02/09/2016
Venue : Department of Civil Engineering, Siliguri Institute of Technology

Summary of the program:

The following points can be noted from the program

- At the beginning they were introduced to the STAAD.Pro and given an elaborated idea of its application in the different areas of the industry
- The topics discussed and taught during the intermediate days of the training were basics, analysis of a structure, load combination and designing of the analysed structure.
- Students analyses many structures during the session
- At the end of the training an online exam was conducted
- As per the feedback received from the students end, the entire session was a real success and students learned and enjoyed the session on STAAD PRO

Feedback analysis for training:

HOD, Dept. of Civil Engineering

Departmental T&P Coordinator
Dept. of Civil Engineering

SILIGURI INSTITUTE OF TECHNOLOGY

DEPARTMENT OF CIVIL ENGINEERING

Report for the training on Total Station Survey conducted during 01/08/2016 to 05/08/2016 and 08/08/2016 to 12/08/2016 for 2018 pass out CE students.

Objective of the training: Students will become good surveyor with special skills and digital surveying techniques that is of greater importance in the practical field.

Outcome of the program:

Students will be able to:

- Begin with fundamentals of total station survey.
- Learn on-site digital surveying techniques, which will help to gain practical understanding and essential skill sets required for work in surveying industry.

The program details are as below:

Title of training : Total Station Survey

Resource Organization: NSIC

Date : 01/08/2016 to 05/08/2016 and 08/08/2016 to 12/08/2016

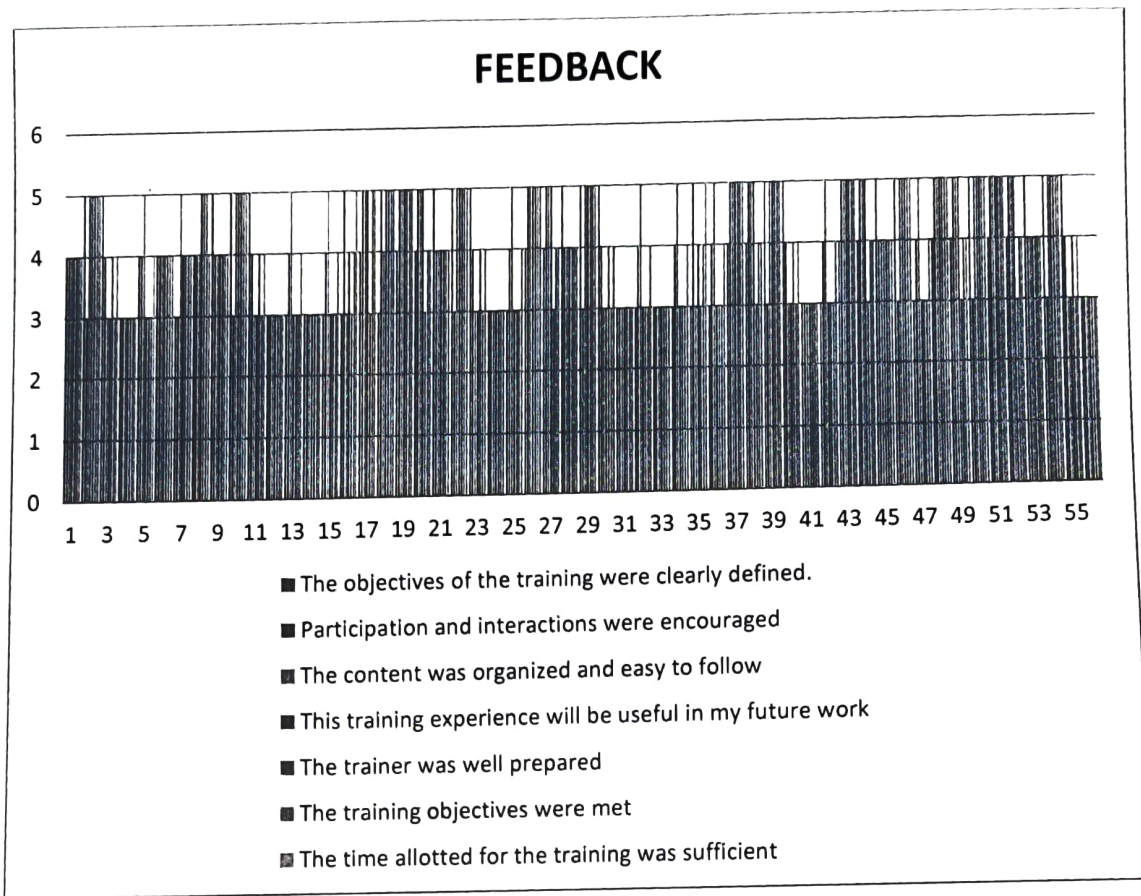

Venue : Dept. of Civil Engineering, Siliguri Institute of Technology

Summary of the program:

The following points can be noted from the program

- At the beginning they were introduced to fundamentals of total station survey.
- The topics discussed and taught during the intermediate days of the training were total station setting and survey, drawing and map preparation using TS data
- At the end of the training an online exam was conducted
- As per the feedback received from the students end, the entire session was a real success and students learned and enjoyed the session on Total Station Survey

Feedback analysis for training:

HOD, Dept. of Civil Engineering

Departmental T&P Coordinator
Dept. of Civil Engineering

Report for Training on advanced JAVA during 01/08/2016 to 12/08/2016 for 3rd year 2017 pass out batch

Introduction:

Apart from University requirement, Java is also a pre-requisite for learning latest technologies like Android and Big Data. In order to prepare and make students ready for industry Computer science department has carved out a course that specifically aligns with industry requirements and conducted by industry experts.

The course 'OOPS with Java' was designed as 12 days online training conducted for 2nd year CSE and IT students. In this training session students learned basic object oriented concepts such as inheritance, encapsulation, and abstraction. They learn how to create and use simple Java classes containing arrays, loops, and conditional constructs. They also learn to use and manipulate object references, and to write simple error handling code. They also learned some advance topic like JSP, Servlets.

Training Objective :

Upon completion of this course, participants will be able to :

- Understand fundamentals of Java programming such as variables, conditional and iterative execution, methods, etc
- Understand fundamentals of object-oriented programming using Java, including defining classes, invoking methods, using class libraries, etc.
- Be able to use the Java SDK environment to create, debug and run simple Java programs
- Be aware of the important topics and principles of software development and write better & more maintainable code
- Be able to program using advanced Java topic like JDBC, Servlets and JSP .

Training Methodology:

- Online on approach to training, behavioral model of training would be practiced.
- During the training, the Trainee would implement a project related to respective modules.
- Commitment to Individual growth and constant evaluation.
- Implementation of programming techniques through a Project.

Training Details:

Title of Training: Advanced JAVA

Resource Organization/ Name of Trainer: NSIC

Date: 01/08/2016 to 12/08/2016

Venue: SIT, Programming Lab I/ SIT, Programming Lab II/OT&UML Lab

Summary of the program:

The following points can be noted from the program.

- ❖ At the beginning of the training trainer has clearly described the basic Introduction to, OOPs programming and java its application in industries in different areas with the students.
- ❖ Students had done many programming by themselves during the trainings.
- ❖ During the training some students raised their queries and the trainer had explained all the queries of the students.
- ❖ At the end of the training an online exam was conducted.
- ❖ As per the feedback received from the students end, the entire session was really fruitful
- ❖ and enjoyable and the students have learned many things about Java

Feedback analysis for the training:

Report for Training on PHP & MySQL during 01/08/2016 to 12/08/2016 for 2nd year 2018 pass out batch

Introduction :

PHP is a server-side scripting language having several frameworks, for instance, Laravel, Symfony, Phalcon and Cake PHP etc. The fundamental functioning of these frameworks is to assist in the promotion of rapid application development (RAD). Laravel is chosen preferably by most of the developers over any other Frameworks considering the compatibility and steady pace it offers to its user. Laravel is a free and open source framework based upon model-view-controller which lets developers build smooth web applications. Laravel allows users to access relational database(Mysql) in a different and easy.

Objective:

students will able to learn

- To enhance the student understanding on the basic yet essential skill of Web Development in an effective way.
- To Use the MVC pattern to organize code
- To Test and debug a PHP application
- To Work with relational data base
- To Use cookies and sessions
- To Work with regular expressions, handle exceptions, and validate data.

PHP : PHP is the web development language written by and for web developers. PHP stands for Hypertext Preprocessor. It is a robust, server-side, open source scripting language that is extremely flexible and very easy to learn. PHP is also cross platform which means that PHP scripts will run on UNIX, Linux, Windows NT server and now Mac OS (Why PHP, 2004). In (Linux. n.d.), PHP is defined as an official module of Apache HTTP server, the market-leading free web server that runs about 67 percent of the web servers.

MySQL : MySQL (pronounced My SEE Q EL) is one of the standard query languages for interacting with databases. MySQL is an open source database server that is free and extremely fast. MySQL is also cross platform and it has a high customer base for its flexible licensing terms, ease of use and high performance. Its acceptance was aided in part by the wide variety of other technologies such as PHP, Java and Perl (Linux. n.d.).

Apache : Apache is the most popular of all the web servers available because it supplies basic web server functionalities (Linux Web Solutions, 2000).

Training Methodology:

- Hands on practice to training, behavioral model of training would be practiced.
- During the training, the Trainee would implement a project related to respective modules.
- Commitment to Individual growth and constant evaluation.
- Implementation web programming techniques through a Project.

Training Details:

Title of Training: PHP & MySQL

Resource Organization/ Name of Trainer: NSIC

Date: 01/08/2016 to 12 /08/2016

Venue: SIT Project lab/SIT Programming LAB II/SIT OT&UML Lab

Summary of the program:

The following points can be noted from the program.

- ❖ At the beginning of the training trainer has clearly described the basic Introduction to PHP and its application in industries in different areas with the students.
- ❖ Students had done many programming by themselves during the trainings.
- ❖ During the training some students raised their queries and the trainer had explained all the queries of the students.
- ❖ At the end of the training an online exam was conducted.
- ❖ As per the feedback received from the students end, the entire session was really fruitful
- ❖ and enjoyable and the students have learned many things about MySQL data base

Feedback analysis for the training:

Report for Training on advanced JAVA during 01/08/2016 to 12/08/2016 for 3rd year 2017 pass out batch

Introduction:

Apart from University requirement, Java is also a pre-requisite for learning latest technologies like Android and Big Data. In order to prepare and make students ready for industry Computer science department has carved out a course that specifically aligns with industry requirements and conducted by industry experts.

The course 'OOPS with Java' was designed as 12 days online training conducted for 2nd year CSE and IT students. In this training session students learned basic object oriented concepts such as inheritance, encapsulation, and abstraction. They learn how to create and use simple Java classes containing arrays, loops, and conditional constructs. They also learn to use and manipulate object references, and to write simple error handling code. They also learned some advance topic like JSP, Servlets.

Training Objective :

Upon completion of this course, participants will be able to :

- Understand fundamentals of Java programming such as variables, conditional and iterative execution, methods, etc
- Understand fundamentals of object-oriented programming using Java, including defining classes, invoking methods, using class libraries, etc.
- Be able to use the Java SDK environment to create, debug and run simple Java programs
- Be aware of the important topics and principles of software development and write better & more maintainable code
- Be able to program using advanced Java topic like JDBC, Servlets and JSP .

Training Methodology:

- Online on approach to training, behavioral model of training would be practiced.
- During the training, the Trainee would implement a project related to respective modules.
- Commitment to Individual growth and constant evaluation.
- Implementation of programming techniques through a Project.

Training Details:

Title of Training: Advanced JAVA

Resource Organization/ Name of Trainer: NSIC

Date: 01/08/2016 to 12/08/2016

Venue: SIT, Programming Lab I/ SIT, Programming Lab II/OT&UML Lab

Summary of the program:

The following points can be noted from the program.

- ❖ At the beginning of the training trainer has clearly described the basic Introduction to, OOPs programming and java its application in industries in different areas with the students.
- ❖ Students had done many programming by themselves during the trainings.
- ❖ During the training some students raised their queries and the trainer had explained all the queries of the students.
- ❖ At the end of the training an online exam was conducted.
- ❖ As per the feedback received from the students end, the entire session was really fruitful
- ❖ and enjoyable and the students have learned many things about Java

Feedback analysis for the training:

Brief report of Training Program on "5 Days Value Added Technical Training"

Bootstrap is a free front-end framework for faster and easier web development. Bootstrap includes HTML and CSS based design templates for typography, forms, buttons, tables, navigation, modals, image carousels and many other, as well as optional JavaScript plugins. Bootstrap also gives you the ability to easily create responsive designs. This Course will reduce the gap between the college and the industry; this will provide the essential knowledge and skill to work with confidence. The students would be trained with qualitative skill, employment oriented dexterity, quantitative aptitude, soft skills and others required for their employment.

Objective of the training program: Students will be explored to understand the basic areas and applications of HTML, Java Script, and BOOSTRAP. They also acquire the skills to develop web page and the formation of different tools in internet using some programming knowledge.

Outcome of the training program:

- Able to exhibit knowledge to understand the preliminary concept about HTML, JAVA SCRIPT & BOOSTRAP
- Able to design web page and creation of different multimedia tools using HTML, JAVA SCRIPT

The program details are as below:

Title of program: 5 Days Value Added Technical Training

Resource Organization: Webel

Name of Resource Person: Barun Mandal

Date: 23.09.2016-28.09.2016

Time: 10.00 am-5 pm.

Venue: APJ Abdul Kalam Seminar Hall/Smart Class Room, Department of Electrical Engineering, SIT

Summary of the Program:

- In the very first session trainers have clearly demonstrated the need of the knowledge of HTML, JAVA SCRIPT, soft-skills and industry interactions in their professional career.
- In the next part of session some fruitful procedures for the programming knowledge in JAVA and HTML language has been discussed. In this session students shall be entitled to develop some common generalized procedures for the coding analysis.
- From the next part of the session instructor provided some assignments on the proposed problems. Students are advised to solve the problems and they may make a group for such interactive discussion.

- In the later part of the program some suitable techniques on the aspect of webpage design has been discussed using various multimedia tools. This has been a wonderful session among the students where they found some positive interests for designing of various websites and associated activities using the application of HTML and JAVASCRIPT.
- During the interactive session some students raised their queries and they motivated to arrange some group discussions/industry awareness/grooming sessions among themselves. Bright students are entitled to help the weak students in this case for establishing a team-work and ethics.
- All the students are entitled to prepare a brief report on the training program at the end training.
- The attendance record of the students throughout the session was satisfactory. However sincere students attended the program.
- As per the feedback received from the students end, the entire session was really fruitful and enjoyable and this kind of training program may be for longer period in future for such better output.
- In the concluding part trainers thanked all the students for their patience hearing and gave his contact no. and email id for future correspondence.
- *The program continued with 58 students from 2nd year of Electrical Engineering Department.*

SILIGURI INSTITUTE OF TECHNOLOGY

**Training Report on soft skills & life skills duration 16/8/2016 to 26/9/2016 for 4th Year
2017 Pass Out Batch**

INTRODUCTION :

Soft Skills are the set of skills that a person should possess in order to face life's daily challenges successfully and to positively adapt to it. This would build the self confidence in an individual to handle life challenges in a more effective manner. In order to visualize a clearer picture on soft skills, let us now look at some more definitions,

1. Soft skills are the behaviors and characteristics that people demonstrate unconsciously and routinely (Daytona Beach Community College)
2. For success in the workplace, the contribution of soft skills are 85% and contribution of technical skills are 15%
3. Soft skills are learned through practice and experience (DDI International)
4. Soft skills will take you higher in your profession while giving you the technical skills to provide an efficient service

This module will introduce several important soft skills that are vital to overcome challenges in life. Discuss the importance of soft skills with the participants. Arrange their ideas in an orderly manner.

TRAINING OBJECTIVES

The participants shall be able to achieve the following objectives at the end of this training

- To build and maintain interpersonal relationships.
- To make meaningful/appropriate decisions
- Efficient Communication
- To influence the professional development
- For effective, efficient and higher performance

Soft Skills Training sessions covered :

- Understand General Expectations from Corporate standpoint • Corporate attire
- Introduction during the interview process
- Mock Interviews
- An overview to communication in the interview process
- Communicate effectively with recruiters

Methodology

- Experiential Learning
- Ample use of role plays

Brief Report on “Finishing School Program (FSP)” from 16/08/2016 to 26/08/2016 for 2017 pass out Electrical Engineering students.

FSP program is conducted for the overall aptitude and personality development for the student required to appear for any interview which also impart also addition of value for the students. An aptitude test is a systematic means of testing a job candidate's abilities to perform specific tasks and react to a range of different situations. The tests each have a standardized method of administration and scoring, with the results quantified and compared with all other test takers. FSP will reduce the gap between the college and the industry; this will provide the essential knowledge and skill to work with confidence. The students understand the industrial needs and expectations to face the interview confidently and secure the suitable position. Soft skills include: attitude, communication skills, time management, critical thinking and a slew of other categories that do not relate to intelligence. The students would be trained with qualitative skill, employment oriented dexterity, quantitative aptitude, soft skills and others required for their employment.

Objective of the training: Students will be explored to enhance business communication and interpersonal skills. They also acquire the skills to solve the aptitude questions for any recruitment drive in a structured manner.

.Outcome of the program:

Students will be able to:

- Able to exhibit knowledge, skills and attitude required to deliver organizational goals.
- Able to recognize basic needs of Human Resource Management in a modern corporate world.
- Gain skills on solving different aptitude questions based on standard campus recruitment drive.

The program details are as below:

Title of training: *Finishing School Program (F.S.P)*

Resource Organization: Vista Mind

Date : 16/08/2016 to 26/08/2016

Venue: Department of Electrical Engineering, Siliguri Institute of Technology

Summary of the program:

The following points can be noted from the program

- In the very fast 1st session trainers have clearly demonstrated the need of skill of solving aptitude questions quickly, soft-skills, personality development, group discussions and industry interactions in their professional career.
- 1st half of every training day was conducted by Mr. Amit Kumar Dhar and he was engaging the students by teaching and practicing the quick solving ways of any aptitude problems. Mr. Dhar discussed suitable techniques for solving aptitude questions comprises of quantitative aptitude, logical, verbal and non-verbal reasoning.
- The students became very much interested and learn from the training.
- 2nd half of every training day was conducted by Mr. Devanjan Sarkar. In this session some fruitful procedures for the overall grooming had been discussed. By taking students on a journey

VISION OF THE DEPARTMENT:

To emerge as a leading Department of Electrical Engineering that caters to the latest needs of power sector, electrical & allied industry in the region.

MISSION OF THE DEPARTMENT:

To evolve as an innovative & globally competent Electrical Engineering department that contributes to the socio - economic growth of region by utilizing the advancement in Electrical Engineering by providing conducive learning and interactive environment to students and faculty.

SILIGURI INSTITUTE OF TECHNOLOGY ELECTRICAL ENGINEERING

through choosing the right job into understanding the mind of the recruiter to make it there while building competence in elements like resume building, cover letters, email etiquette, interviews and follow-ups.

- Some course materials for placement aptitude papers have been given to the students for solving within the prescribed time limit and some easy and quick method was provided to the students.
- During the interactive session some students raised their queries and they motivated to arrange some group discussions/industry awareness/grooming sessions among themselves. Bright students are entitled to help the weak students in this case for establishing a team-work and ethics.
- In the concluding part trainers thanked all the students for their patience hearing .
- The program continued with about total 374 students from all Departments.
- As per the feedback received from the students end the industrial training was fruitful and highly appreciable for the students and the instructor has demonstrated all the necessary topics in a healthy manner.

The students would be trained with qualitative skill, employment oriented dexterity, quantitative aptitude, soft skills and others required for their employment.

Objective of the training: Students will be explored to enhance business communication and interpersonal skills. They also acquire the skills to solve the aptitude questions for any recruitment drive in a structured manner.

Outcome of the program:

Students will be able to:

- Able to exhibit knowledge, skills and attitude required to deliver organizational goals.
- Able to recognize basic needs of Human Resource Management in a modern corporate world.
- Gain skills on solving different aptitude questions based on standard campus recruitment drive.

The program details are as below:

Title of training: Finishing School Program (F.S.P)

Resource Organization: Vista Mind

Date : 16/08/2016 to 26/08/2016

Venue: Department of Electrical Engineering, Siliguri Institute of Technology

Summary of the program:

The following points can be noted from the program

- In the very fast 1st session trainers have clearly demonstrated the need of skill of solving aptitude questions quickly, soft-skills, personality development, group discussions and industry interactions in their professional career.
- 1st half of every training day was conducted by Mr. Amit Kumar Dhar and he was engaging the students by teaching and practicing the quick solving ways of any aptitude problems. Mr. Dhar discussed suitable techniques for solving aptitude questions comprises of quantitative aptitude, logical, verbal and non-verbal reasoning.
- The students became very much interested and learn from the training.
- 2nd half of every training day was conducted by Mr. Devanjan Sarkar. In this session some fruitful procedures for the overall grooming had been discussed. By taking students on a journey

VISION OF THE DEPARTMENT:

To emerge as a leading Department of Electrical Engineering that caters to the latest needs of power sector, electrical & allied industry in the region.

MISSION OF THE DEPARTMENT:

To evolve as an innovative & globally competent Electrical Engineering department that contributes to the socio - economic growth of region by utilizing the advancement in Electrical Engineering by providing conducive learning and interactive environment to students and faculty.

SILIGURI INSTITUTE OF TECHNOLOGY ELECTRICAL ENGINEERING

through choosing the right job into understanding the mind of the recruiter to make it there while building competence in elements like resume building, cover letters, email etiquette, interviews and follow-ups.

- Some course materials for placement aptitude papers have been given to the students for solving within the prescribed time limit and some easy and quick method was provided to the students.
- During the interactive session some students raised their queries and they motivated to arrange some group discussions/industry awareness/grooming sessions among themselves. Bright students are entitled to help the weak students in this case for establishing a team-work and ethics.
- In the concluding part trainers thanked all the students for their patience hearing .
- The program continued with about total 374 students from all Departments.
- As per the feedback received from the students end the industrial training was fruitful and highly appreciable for the students and the instructor has demonstrated all the necessary topics in a healthy manner.

SILIGURI INSTITUTE OF TECHNOLOGY

**Report for Training on HTML, Java script, Bootstrap, CSS during
23/09/2016 to 28/09/2016 for 2nd year 2019 pass out batch**

Introduction :

Front-end web development, also known as client-side development is the practice of producing HTML, CSS and JavaScript for a website or Web Application so that a user can see and interact with them directly. The challenge associated with front end development is that the tools and techniques used to create the front end of a website change constantly and so the developer needs to constantly be aware of how the field is developing. The objective of designing a site is to ensure that when the users open up the site they see the information in a format that is easy to read and relevant. This is further complicated by the fact that users now use a large variety of devices with varying screen sizes and resolutions thus forcing the designer to take into consideration these aspects when designing the site. They need to ensure that their site comes up correctly in different browsers (cross-browser), different operating systems (cross-platform) and different devices (cross-device), which requires careful planning on the side of the developer.

A front-end developer architects and develops websites and web applications using web technologies (i.e., HTML, CSS, and JavaScript), which typically runs on the Open Web Platform or acts as compilation input for non-web platform environments

A person enters into the field of front-end development by learning to build a website or web application which relies on HTML, CSS, and JavaScript and commonly runs in a web browser but can also run in a headless browser, Web View, or as compilation input for a native runtime environment. These four run times scenarios are explained below.

Objective of Training :

The students the need of developing a theoretically and practically sound curriculum with strong “Web Technology “ concepts and diagnose common HTML and CSS cross browser problems, and use appropriate tools and techniques to fix them.

Hyper Text Markup Language (aka HTML)

HyperText Markup Language, commonly referred to as HTML, is the standard markup language used to create web pages. Web browsers can read HTML files and render them into visible or audible web pages. HTML describes the structure of a website semantically along with cues for presentation, making it a markup language, rather than a programming language.

Cascading Style Sheets (aka CSS)

Cascading Style Sheets (CSS) is a style sheet language used for describing the look and formatting of a document written in a markup language. Although most often used to change the style of web pages and user interfaces written in HTML and XHTML, the language can be applied to any kind of XML document, including plain XML, SVG and XUL. Along with HTML and JavaScript, CSS is a cornerstone technology used by most websites to create visually engaging webpages, user interfaces for web applications, and user interfaces for many mobile applications.

JavaScript :

JavaScript is a high level, dynamic, untyped, and interpreted programming language. It has been standardized in the ECMA Script language specification. Alongside HTML and CSS, it is one of the three essential technologies of World Wide Web content production; the majority of websites employ it and it is supported by all modern web browsers without plug-ins. JavaScript is prototype-based with first-class functions, making it a multi-paradigm language, supporting object-oriented, imperative, and functional programming styles. It has an API for working with text, arrays, dates and regular expressions, but does not include any I/O, such as networking, storage or graphics facilities, relying for these upon the host environment in which it is embedded.

Bootstrap :

- It is a free front-end framework for faster and easier web development.
- It combines HTML, CSS and JS based design templates for typography, forms, buttons, tables, navigation, modals, image carousels and numerous other components, as well as JavaScript plugins.
- It provides you with a convenient approach for creating responsive designs.

Applications of Bootstrap

- Scaffolding – Bootstrap provides a basic structure with Grid System, link styles, and background. This is covered in detail in the section Bootstrap Basic Structure
- CSS – Bootstrap comes with the feature of global CSS settings, fundamental HTML elements styled and enhanced with extensible classes, and an advanced grid system. This is covered in detail in the section Bootstrap with CSS.
- Components – Bootstrap contains over a dozen reusable components built to provide iconography, dropdowns, navigation, alerts, pop-overs, and much more. This is covered in detail in the section Layout Components.
- JavaScript Plugins – Bootstrap contains over a dozen custom jQuery plugins. You can easily include them all, or one by one. This is covered in details in the section Bootstrap Plugins.
- Customize – You can customize Bootstrap's components, LESS variables, and jQuery plugins to get your very own version.

Training Methodology:

- Hands on practice on approach to training, behavioral model of training would be practiced.
- During the training, the Trainee would implement a project related to respective modules.
- Commitment to Individual growth and constant evaluation.
- Implementation of programming techniques through a Project.

Training Details:

Title of Training: HTML, Javascript, Bootstrap, CSS

Resource Organization/ Name of Trainer: PCS Global

Date: 23/09/2016 to 24/09/2016 and 26/09/2016 to 28/09/2016

Venue: SIT Programming Lab 1/ SIT Programming Lab II

Summary of the program:

The following points can be noted from the program.

- ❖ At the beginning of the training trainer has clearly described the basic Introduction tools of front end designing web technology its application in industries in different areas.
- ❖ Students had done many front end designing applications by themselves during the trainings.
- ❖ During the training some students raised their queries and the trainer had explained all the queries of the students.
- ❖ At the end of the training an online exam was conducted.
- ❖ As per the feedback received from the students end, the entire session was really fruitful
- ❖ and enjoyable and the students have learned many things about bootstrap web tools.

Feedback analysis for the training:

Training on HTML, JavaScript, CSS, Bootstrap

Introduction:

Today's user expects a lot out of the web page: it has to load fast, expose the desired service, and be comfortable to view on all devices: from a desktop computers to tablets and mobile phones. In this course, we will learn the basic tools that every web page coder needs to know. We will start from the ground up by learning how to implement modern web pages with HTML and CSS. We will then advance to learning how to code our pages such that its components rearrange and resize themselves automatically based on the size of the user's screen. We'll be able to code up a web page that will be just as useful on a mobile phone as on a desktop computer. No "pinch and zoom" required! Last but certainly not least, we will get a thorough introduction to the most ubiquitous, popular, and incredibly powerful language of the web: Javascript. Using Javascript, we shall be able to build a fully functional web application that utilizes Ajax to expose server-side functionality and data to the end user.

Objective: After attending the training, students should be able to understand

1. Learn to build mobile responsive web pages, using the Bootstrap Framework.
2. Learn to work with variables, conditional statements, arrays, and loops in JavaScript.
3. Learn to build stylish forms in Bootstrap with complete JavaScript enabled validation.

Program Details:

Training Program: HTML, JavaScript, CSS, Bootstrap

Resource Organization: PCS Global

Date: 23/09/2016 to 24/09/2016 and 26/09/2016 to 28/09/2016

Students who can attend: B. Tech (ECE) 3rd Sem-2019 PO.

Feedback Analysis

Report of Feedback Analysis:

Feedback for training was taken on 28/09/2016 with the 2nd year students (2019 PO). Analysis of feedback is listed below:

1. Online material should be provided for making clear the concept.
2. Due to problem of internet connection students faced difficulty to do their project work.
