	YES	NO			
Is there a need for any change in curriculum and syllabi?	31	30			
If YES, Please provide your suggestion					

Major Suggestions

Providing student proper challenges, be if coding or making queries. Asking them to come up with a question and solution themselves. The depth they can go into something will show their ability to think and get answers for their own selves.
Programming languages must have important role in institution because now a days to join any IT sector we must need any programming language, industrial visit should be done so that students can relate their theory knowledge to practical.
More case studies should be emphasized by the Professors in each subject.
Courses such as competitive programming, python would be beneficial
Good College, Awesome Faculty. good students, great atmosphere
Labs should be more updated.
