The GATE 2017 score is calculated using the formula

$$GATE\ Score = S_q + (S_t - S_q)\frac{(M - M_q)}{(M_t - M_q)}$$

where,

M is the marks obtained by the candidate in the paper, mentioned on this score card in GATE 2017

M_q is the qualifying marks for general category candidate in the paper

$\overline{M_t}$ is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)

S_q = 350, is the score assigned to M_q

S_t = 900, is the score assigned to M_t

In the GATE 2017 score formula, M_q is usually 25 marks (out of 100) or $\mu + \sigma$, whichever is greater. Here μ is the mean and σ is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2017 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship. Admitting institutes may conduct further tests and interviews for final selection.

About

I am a learning enthusiast.I do not believe there is something hard or easy. Easy for us are those things which we can do and hard are those which we can't. If we see all the problems of life through this view, its gives us a proper insight to handle all the pressure and stress. I love taking challenges in life and work. I am a very inquisitive person and this trait helps me in digging deep into my work. I am very quick learner and have the ability to grasp things very easily. I want to solve difficult engineering problems with this mindset and grow in my career.
