Prof. Govind Joseph Chakrapani

Organizing Chairman, GATE 2017 on behalf of NCB-GATE, for MHRD

The GATE 2017 score is calculated using the formula

$$GATE\ Score = S_q + (S_t - S_q) \frac{(M - M_q)}{(\bar{M}_t - M_q)}$$

where,

$M$  is the marks obtained by the candidate in the paper, mentioned on this score card in GATE 2017

$M_q$  is the qualifying marks for general category candidate in the paper

$\bar{M}_t$  is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)

$S_t = 350$ , is the score assigned to  $M_q$

$S_q = 900$ , is the score assigned to  $\bar{M}_t$

In the GATE 2017 score formula,  $M_q$  is usually 25 marks (out of 100) or  $\mu + \sigma$ , whichever is greater. Here  $\mu$  is the mean and  $\sigma$  is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2017 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship.

Admitting institutes may conduct further tests and interviews for final selection.

$$\text{GATE Score} = S_q + (S_i - S_q) \frac{(M - M_q)}{(\bar{M}_i - M_q)}$$

- where,
- $M$  is the marks obtained by the candidate in the paper, mentioned on this scorecard,
  - $M_q$  is the qualifying mark for general category candidate in the paper,
  - $\bar{M}_i$  is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper, (in case of multi-session papers including all sessions)
  - $S_q = 350$  is the Score assigned to  $M_q$

### Management Aptitude Test and Test Scores

- 1 The Management Aptitude Test (MAT) is designed to measure the aptitude of a candidate for pursuing management education and should be used only for this purpose.
- 2 MAT is administered in five sections-Language Comprehension, Mathematical Skills, Data Analysis & Sufficiency, Intelligence & Critical Reasoning and Indian & Global Environment-each section testing a different ability relevant for management education.
- 3 All MAT administrations necessarily have different questions. Thus one administration may be slightly more difficult or less difficult than another. Scaling has been used to take care of these differences.
- 4 The scaled scores reported are standardised scores for respective sections. These scores are reported on a scale of 0 to 100. Extreme scores (below 15 or above 85) are rare.
- 5 The percentile below column indicates the percentage of candidates in the test who scored below that of the candidate in the section.
- 6 The Composite score is an overall scaled score based on the first four sections of MAT. This is reported on a scale of 199 to 801.
- 7 The percentile below for the Composite Score represents the percentage of candidates whose composite scores are below the candidate's. The composite score has a validity period of one year.
- 8 All scores and percentile below figures are reported after rounding off to the nearest whole number.
- 9 Personal data is as reported by the candidate.

Qualifying marks in GATE are set by the committee responsible for post-graduate programmes in technical disciplines. Following methods may be used to convert marks out of 100 to marks out of 1000.

From GATE 2020, the qualifying marks in a general category candidate in each paper is a score of 25 marks (25%) in each of the papers, where 25 is the score and 100 is the standard deviation of marks of all the candidates who appeared in this paper. The qualifying marks for OBC (NCL) and SC+ST candidates are 19% and 15% of the total marks respectively, which are subject to change periodically. The GATE 2020 score card is given as follows:

$$\text{GATE Score} = S_1 + (S_2 - S_1) \frac{(x - H_1)}{(H_2 - H_1)}$$

where

$H_1$  is marks of all OBC candidates in the candidate's paper

$H_2$  is the qualifying marks for general category candidate in the paper

$H_3$  is the marks of all SC+ST candidates in the candidate's paper (if the candidate belongs to reserved category in the previous session of multiple-session papers including all sessions)

$S_1 = 100$  is the score assigned to  $H_1$

$S_2 = 1000$  is the score assigned to  $H_2$

In multiple-session Engineering and Technology Engineering papers, the marks of mark of  $i^{\text{th}}$  candidate in the  $j^{\text{th}}$  session ( $S_{ij}$ ) was converted using the formula:

$$S_{ij} = \frac{S_2 - H_1^j}{H_2^j - H_1^j} (H_3^j - S_{ij}) + H_1^j$$

where

$H_1^j$  is the marks of candidates in the  $j^{\text{th}}$  session of  $i^{\text{th}}$  session

$H_2^j$  is the average marks of the top 5% of the candidates considering all sessions

$H_3^j$  is the marks of reserved category candidate in the previous session of the candidate in the previous session of marks

$H_4^j$  is the average marks of the top 5% of the candidates in the  $j^{\text{th}}$  session

$H_5^j$  is the marks of reserved category candidate in the  $j^{\text{th}}$  session

The GATE 2018 score is calculated using the formula

$$\text{GATE Score} = S_0 + (S_1 - S_0) \frac{(M - M_0)}{(M_1 - M_0)}$$

where,

$M$  is the marks obtained by the candidate in the paper mentioned on the GATE 2018 scorecard

$M_0$  is the qualifying marks for general category candidates in the paper

$M_1$  is the mark of the candidate of 15% or top 10% whichever is larger of the candidates who appeared in the paper in the same category based on papers included in the scorecard

$S_0 = 175$  is the score assigned to  $M_0$

$S_1 = 900$  is the score assigned to  $M_1$

In the GATE 2018 score formula,  $M_0$  is 15 marks for all 10 papers, and whichever is greater (15 or 10) the mean and std dev of the scorecard is calculated on the basis of all the candidates who appeared in the paper

Qualifying in GATE 2018 does not guarantee admission to any particular program or admission to any particular institution. Each institution may require further tests and interviews for final selection.

$$GATE\ Score = S_q + (S_t - S_q) \frac{(M - M_q)}{(\bar{M}_t - M_q)}$$

where,

$M$  is the marks obtained by the candidate in the paper, mentioned on this scorecard in GATE 2016

$M_q$  is the qualifying marks for general category candidate in the paper

$\bar{M}_t$  is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)

$S_q = 350$ , is the score assigned to  $M_q$

$S_t = 900$ , is the score assigned to  $\bar{M}_t$

In the GATE 2016 score formula,  $M_q$  is 25 marks (out of 100) or  $\mu + \sigma$ , whichever is greater. Here  $\mu$  is the mean and  $\sigma$  is the standard deviation of marks of all the candidates who appeared in the paper.

 In the GATE 2016 score formula,  $M_q$  is 25 marks (out of 100) or  $\mu + \sigma$ , whichever is greater. Here  $\mu$  is the mean and  $\sigma$  is the standard deviation of marks of all the candidates who appeared in the paper.  
 Qualifying in GATE 2016 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship. Admitting institutes may conduct further tests and interviews for final selection.

The GATE 2017 score is calculated using the formula

$$GATE\ Score = S_q + (S_t - S_q) \frac{(M - M_q)}{(\bar{M}_t - M_q)}$$

where,

$M$  is the marks obtained by the candidate in the paper, mentioned on this score card in GATE 2017

$M_q$  is the qualifying marks for general category candidate in the paper

$\bar{M}_t$  is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)

$S_q = 350$ , is the score assigned to  $M_q$

$S_t = 900$ , is the score assigned to  $\bar{M}_t$

In the GATE 2017 score formula,  $M_q$  is usually 25 marks (out of 100) or  $\mu + \sigma$ , whichever is greater. Here  $\mu$  is the mean and  $\sigma$  is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2017 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship.

Admitting institutes may conduct further tests and interviews for final selection.
