Broad Objectives of the chapter/topic are:

- 1. They are able to explain to analyze, investigate and evaluate.
- 2. They are able to judge how to apply theory.

Once the student has completed this topic/ chapter he/she will be able to answer following questions/perform the following activities (Performance Criteria/Indicators with Levels of Bloom's Taxonomy):

Discussion most of the university questions in last 5 years.

a) Teaching Strategy/Method (describe instructional methods, usage of ICT, efficient and engaging instructions and display the best practices on institutional website)

- 1) To giveAssignments
- 2) By giving more interesting examples
- 3) Giving lectures in power point presentation

b) Strategy to support weak students

- 1) Toengagetheweakstudentsinhabitofstudying, Igivehimsomeeasyquestionsinregularbasis.
- 2) Someweakstudents also have a problem that they forget what they learn. In myclass I always give some tips on how to recall and how to write systematically.
- 3) Weakstudentsneedspecialattentionevenaftercollegehours. Ialways givesomeextrahourstoa weak student.

c) Strategy to encourage bright students

- 1) Have an extra challenge ready that allows the student to go deeper into the subject, learn a little more, or apply a skill he has just learned in a new way.
- 2) Some students are engaged with the final year students for their final project.

d) Efforts to keep students engaged

- 1) Regular basis Home Work.
- 2) 5-10 minutes spend in an every class for question answer session.
- 3) Quiz in regular basis.

49

4) Some technical assignments in group wise.

e) Analysis of Students performance in the course (internal) (labs, seminars, tests, assignments, quiz, exam etc)

- 73% students have attained these ttarget of 60% marks for CO1
- $\bullet \hspace{0.1in} 83\% students have attained these ttarget of 60\% marks for CO2$
- $\bullet \qquad 89\% \, students have attained the sett arget of 60\% \, marks for CO3$
- $\bullet \quad 86\% students have attained the settarget of 60\% marks for CO4$
- 79% students have attained these ttarget of 60% marks for CO5

f) Analysis of Students performance in the course (university results)

	Target Course Outcome%	TOTAL STUDENTS	TOTAL STUDENT WHO ATTAINED OUTCOME	% STUDENTS WHO ATTAINED THE OUTCOME
University Result	60%	40	36	90%

g) Student Feedback

h) Teacher Self-Assessment (at the completion of course)

At the completion of course I have understood that CO1 and CO5 has reached the attainment levels bot not satisfactorily... That's why more assignments and quiz questions should be provided.

i) Recommendations/Suggestions for improvement by faculty

Text books are available in the library but in previous edition. That's why books should be updated.

(ix) Teaching Strategy/Method

- 1. Learning by example
- 2. Learning by question and answering
- 3. Learning by problem solving
- 4. Use of Power point presentation.
- 5. Use of animations to understand the working principles.

(ixa) Strategy to support weak students

1. Reviewing student attendance in connection with performance, and counselling students about attending classes, advising them for making up classes missed and getting additional help.

- 2. Paying attention to their problems in understanding the subject
- 3. Encouraging them to express their point of trouble
- 4. Allotting extra time beyond schedules class hours to help them understand the topics
- 5. Suggesting them different ways (as found suitable depending upon the case) to overcome their problem.

(ixb) Strategy to encourage bright students

1. Try to encourage them to study beyond the syllabus

2. Ask them to develop the habit of reading anything good and rich in content to update their knowledge about the development in the field of renewable energy.

- 3. Encourage them to help academically weak students.
- 4. Encourage them to do mini projects.

(ixc) Efforts to keep students engaged

- 1. summarize the previous day's lecture and ask random questions.
- 2. Providing informative data/examples/case study related to the topic from the industrial point of view.
- 3. Conducting Informal technical quiz/surprise tests.

(xi) Analysis of Students performance in the course

- 48% students have attained the set target of 65% marks for EE801C.1
- 48% students have attained the set target of 65% marks for EE801C.2
- 58% students have attained the set target of 65% marks for EE801C.3
- 58% students have attained the set target of 65% marks for EE801C.4
- 41% students have attained the set target of 65% marks for EE801C.5

(xii) Analysis of Students performance in the course (university results)

	Target Course Outcome%	TOTAL STUDENTS	TOTAL STUDENT WHO ATTAINED OUTCOME	% STUDENTS WHO ATTAINED THE OUTCOME
University	7	78	76	97%

• 97% students have attained the set target of 7 in point for University Exams

(xiii) Analysis of Student Feed Back

Feedback is taken from 24 students based on the course survey.

(xiv) Teacher Self-Assessment (at the completion of course)

From the analysis of the results obtained it can be seen that set targets for the course outcome have been achieved moderately by the students. Since this course encompasses a wide range of activities and expertise in the optimal use of energy hence some hands-on activities will provide practical exposure for better understanding the course.

(xiv) Recommendations/Suggestions for improvement by faculty

This is a course which requires conceptual understanding of the subject. Students are needed to be motivated to understand the importance energy management & audit. They need to be motivated to understand the environmental impact due to energy consumption and the role of budding engineers to curb the same. Some practical case studies and views of industry expert will help the students to realise the importance of the subject.

5 th and 6 th week	It is undesirable that some useful analogies can be drawn between relation systems of computer mechanism and relation system of brain mechanism. The comparison does not depend upon any close resemblance between the actual mechanical links which occur in brains and computers; it depends on what the machines do. Furthermore, brains and computers can both be originalised so as to solve problems. The mode of communication is very similar in both cases, so much so that computers can now be designed to generate artificial human speech and even, by accident, to produce sequences of words which human beings recognize as poetry. The implication is not that machines are gradually human forms, but that there is no sharp break of continuity between what is human and what is mechanical.

	Dear Mr. Chopra,	
8 th week and 9 th week	I have gone through the letter sent by your office last week. Please be advised that our company can accept the offer to which the letter refers because it would be beneficial for our company in several ways. In fact, we have been looking for such innovative programmes for our junior executives for a long time but no training and consultancy company came forward with such a proposal. You are the first company to send us this interesting proposal.	
	I have gone through the structure of the workshop and find it exhaustive and appropriate. However, the workshop may not be effective unless it includes some project work relating to some important areas of artificial intelligence. Moreover, our company may not be able to upgrade the knowledge level in this regard on a continuous basis unless project work is included.	
	There is no doubt that you have worked hard to design the structure of the programme so that it is suited to our needs. Nevertheless, we would not be able to take any action unless we receive your final proposal. Send this positively by the end of	

	May, 2009.	
	Yours sincerely,	
	(Signature) RS Prasad

(IX) Teaching Strategy / Method

- 1. Detailed use of blackboard
- 2. Good oratory skill with clearly audible volume of lecture
- 3. Interactive classroom
- 4. Always encouraging the students to ask questions
- 5. Use of practical examples or similar models to illustrate the topics.

(IXA) Strategy to support weak students

- 1. Paying attention to their problems in understanding the subject
- 2. Encouraging them to express their point of trouble
- 3. Allotting extra time beyond schedules class hours to help them understand the topics
- 4. Suggesting them different ways (as found suitable depending upon the case) to overcome their problem.

(IXB) Strategy to encourage bright students

- 1. Try to encourage them to study beyond the syllabus
- 2. Ask them to develop the habit of reading anything good and rich in content
- 3. Advise them to try and solve higher level engineering numerical problems.

(IXC) Efforts to keep students engaged

- 1. During class to avoid monotony, some aptitude problems are given to solve.
- 2. Asking random questions to the students from the topic
- 3. Sometimes different tricks or techniques are shown to them to make the lecture interesting.
- 4. Informal technical quiz is also held.

(XII) Teacher Self-Assessment (at the completion of course)

- 1. Syllabus coverage was 100%
- 2. More effort will be given to improve the performance level of CO2 and CO3.

(XIV) Recommendations/Suggestions for improvement by faculty

- 1. Syllabus of Physics-I should be oriented towards more applications in engineering aspects.
- 2. There are no theoretical discussions for most of the lab classes in the lecture part. So there is a gap between theory and lab classes, which needs to be addressed by the University.
- 3. Some popular lectures on a topic of beyond syllabus should be arranged to explore student's knowledge (satisfying PO1).
- 4. Students are advised for regular visit to library for accessing reference books, e-books and journals.
- 5. Additional and revision classes for slow learners.
- 6. Organizing Popular talks and seminars

(ix) Teaching Strategy/Method

- 1. Learning by example
- 2. Learning by question and answering
- 3. Learning by problem solving
- 4. Use of Power point presentation.
- 5. Use of animations to understand the working principles.

(ixa) Strategy to support weak students

1. Reviewing student attendance in connection with performance, and counselling students about attending classes, advising them for making up classes missed and getting additional help.

- 2. Paying attention to their problems in understanding the subject
- 3. Encouraging them to express their point of trouble
- 4. Allotting extra time beyond schedules class hours to help them understand the topics
- 5. Suggesting them different ways (as found suitable depending upon the case) to overcome their problem.

(ixb) Strategy to encourage bright students

1. Try to encourage them to study beyond the syllabus

2. Ask them to develop the habit of reading anything good and rich in content to update their knowledge about the development in the field of renewable energy.

- 3. Encourage them to help academically weak students.
- 4. Encourage them to do mini projects.

(ixc) Efforts to keep students engaged

- 1. summarize the previous day's lecture and ask random questions.
- 2. Providing informative data/examples/case study related to the topic from the industrial point of view.
- 3. Conducting Informal technical quiz/surprise tests.

(xi) Analysis of Students performance in the course

- 40% students have attained the set target of 70% marks for EE704D.1
- 35% students have attained the set target of 65% marks for EE704D.2
- 35% students have attained the set target of 65% marks for EE704D.3
- 32% students have attained the set target of 65% marks for EE704D.4
- 34% students have attained the set target of 65% marks for EE704D.5

(xii) Analysis of Students performance in the course (university results)

	Target Course Outcome%	TOTAL STUDENTS	TOTAL STUDENT WHO ATTAINED OUTCOME	% STUDENTS WHO ATTAINED THE OUTCOME
University				

• 60% students have attained the set target of 7 in point for University Exams

(xiii) Analysis of Student Feed Back

Feedback is taken from 24 students based on the course survey.

(xiv) Teacher Self-Assessment (at the completion of course)

From the analysis of the results obtained it can be seen that set targets for the course outcome have been achieved moderately by the students. Since this course encompasses a wide range of activities and expertise in the optimal use of energy hence some hands-on activities will provide practical exposure for better understanding the course.

(xiv) Recommendations/Suggestions for improvement by faculty

This is a course which requires conceptual understanding of the subject. Students are needed to be motivated to understand the importance energy management & audit. They need to be motivated to understand the environmental impact due to energy consumption and the role of budding engineers to curb the same. Some practical case studies and views of industry expert will help the students to realise the importance of the subject.

Dear Students

This feedback that I intend to take from you is very precisely about fulfillment of course objectives and course outcomes. My course objectives and course outcomes are as follows that I had shared with you in the beginning of the semester, the same is repeated here.

Course Objectives

Students will acquire basic knowledge about current energy scenario, energy management, auditing and conservation.

Course Outcomes

The students will be able to:

- EE704D.1 Identify different Renewable and Non Renewable Energy Sources and realize their environmental impact (BT 2)
- EE704D.2 Illustrate Solar geometry and describe different methods of solar energy conversion. (BT 3)

EE704D.3 Demonstrate knowledge about Working Principles of Wind Power generation and its application. (BT 3)

EE704D.4 Explain generation & harnessing of power from Biomass, Geothermal, ocean energy. (BT 3)

EE704D.5 Discuss about different direct energy conversion systems like MHD & Fuel cells. (BT 3)

The survey questions below has been designed to obtain your feedback so as to determine the extent of attainment of the intended course objectives and course outcomes.

(x) Teaching Strategy/Method

- Learning by Recapitulating the previous knowledge and understanding the topic based on memorizing them. If students fail to give any answer of the questions from the previous semesters it is advised to cover the topics from books, internet or any other resources. Sometimes video lecture, NPTEL study materials are very much useful for the students to clear their doubt. So resources are provided them to gather knowledge. Students share their knowledge through verbal discussion or by using social networks keeping in mind that "it is easy to gather knowledge but it is not so easy to assimilate". Sharing of knowledge can increase the level of knowledge.
- **Drawing suitable Analogy**: Wherever necessary analogy helps the students to make them understand in better way.
- **Solving the numerical problems** not only engage the students but also help them to think, understand and write the topic. Doubts are cleared during solving a problem.
- **Simulation** through EDA tools validates the theoretical knowledge. Sometimes the students expect the result of the theoretical part by simulating the circuit or any model. In this way their interest level may be uplifted.
- Question and Answer sessions clears the doubts. If the questions are repeatedly asked and the answers are also discussed repeatedly the weak students can remember them very easily. Next time they will be able to answer.

(xa) Strategy to support weak students

- Forming a pair with the bright students
- Reviewing the real problem sympathetically. Motivating them to do the classes regularly and encouraging by floating easy questions in the theory classes.
- Advising them for getting additional help from teachers as well as bright student.
- Providing continuous assistance.
- Additional doubt clearing sessions (Beyond Class hours)

(xb) Strategy to encourage bright students

- Involving them to solve complex numerical problems.
- Motivate them to write paper for publications. Thus they got the knowledge about the topic and know the emerging technologies, find the gap and try to bridge it.
- Giving Board work or power point presentation on a given topic.
- Bright students are involved to boost up the weak students. Sometimes it is the measuring parameter for the bright students that how much extent they can lift the weak students.

(xc) Efforts to keep students engaged

- Giving numerical problem or writing something on a topic and finally the copies are checked by other students arbitrarily chosen. The accepted answer will be finally explained by few of them.
- Providing Questionnaire session. Any student may be asked to answer the question. Other students will be randomly chosen to justify the answers.
- To write the questions they may have and try to find out the solutions after discussion among them.

(xi) Analysis of Students performance in the course (Internal Results)

(xiii) Analysis of Student Feed Back

Formative:

Summative:

CO-Based:

(xiv)Teacher Self-Assessment (at the completion of course)

From the graphical analysis of the results obtained, it can be seen that most of the course outcome have been achieved successfully by the students but the set target for CO 3 has just touched the attainment level due to difficulty in understanding the analog VLSI circuits to which they are exposed for the first time.

(xv) Recommendations/Suggestions for improvement by faculty

• More emphasis should be given to clear the concepts related to Analog VLSI circuits.

1.	1. Explain the following reactions with a suitable example. (i) Wolff-Kishner reduction, (ii) Cannizzaro reaction, iii) Friedel Crafts' reaction, iv) Tollens' test and Fehlings' test, v) SN ₁ and SN ₂ reaction mechanism, vi) Nucleophilic addition.(a) Phenol on treatment with Br ₂ in CS ₂ at low temperature gives two isomeric mono bromophenols 'X' and 'Y'. But phenol on treatment with bromine water gives a white precipitate 'Z'. Identify the products 'X', 'Y' and 'Z' with chemical reactions. (b) What do you mean by enantiomer and diastereomer? Differentiate them with examples. (c) Give one example of each of Friedel Crafts' alkylation and acylation reaction.(d) Predict the major product(s) of the following reactions and explain their formation: i) H ₃ C - CH = CH ₂ $\xrightarrow[HBr]{(Ph-CO-O)2}{HBr}{\rightarrow}$ ii) H ₃ C - CH = CH ₂ $\xrightarrow[HBr]{(Ph-CO-O)2}{HBr}{\rightarrow}$ (e) Write down the criteria for aromaticity.	1

Exam			

Course target attainment levels:

Attainment Level	Inference
Attainment Level 1	40% of the students have attained more than the target level of that CO
Attainment Level 2	50% of the students have attained more than the target level of that CO
Attainment Level 3	60% of the students have attained more than the target level of that CO

Overall Course Attainment Target = 60% of the students will get "A" Grade

Target has been set on the basis of last year's performance / result by the students, student quality this year and difficulty level of the course.

University Grading System:

Grade	Marks
0	90% and above
E	80 – 89.9%
А	70 – 79.9%
В	60 – 69.9%
С	50 – 59.9%
D	40 – 49.9%
F	Below 40%

(vi) Mapping of Course Outcomes and Program Outcomes:

Course Outcomes		Program Outcomes							P	SOs				
	1.	2.	3.	4.	5.	6.	7.	8.	9.	10.	11.	12	1.	2.
BSCH201.1	2								1					
BSCH201.2	2	2							1			1	1	
BSCH201.3	2	2							1			1	1	
BSCH201.4	2	2							2			1	1	
BSCH201	2	2							2			1	1	

Justification: SinceBS- CH101 is a foundation course for B.Tech, CO1 to CO4 satisfy at low level of PO1 whereas CO2 to CO4 satisfy moderately with PO2. Since CO4 is satisfying through laboratory experiments and students works in group in the laboratory, it also satisfies little on individual and team work (PO9).

(IX) Teaching Strategy / Method

- 1. Detailed use of blackboard
- 2. Good oratory skill with clearly audible volume of lecture
- 3. Interactive classroom
- 4. Always encouraging the students to ask questions
- 5. Use of practical examples or similar models to illustrate the topics.

(IXA) Strategy to support weak students

- 1. Paying attention to their problems in understanding the subject
- 2. Encouraging them to express their point of trouble
- 3. Allotting extra time beyond schedules class hours to help them understand the topics
- 4. Suggesting them different ways (as found suitable depending upon the case) to overcome their problem.

(IXB) Strategy to encourage bright students

- 1. Try to encourage them to study beyond the syllabus
- 2. Ask them to develop the habit of reading anything good and rich in content
- 3. Advise them to try and solve higher level engineering numerical problems.

(IXC) Efforts to keep students engaged

- 1. During class to avoid monotony some aptitude problems are given to solve.
- 2. Asking random questions to the students from the topic
- 3. Sometimes different tricks or techniques are shown to them to make the lecture interesting.
- 4. Informal technical quiz is also held.

(XII) Teacher Self-Assessment (at the completion of course)

- Syllabus coverage was almost 100%.
- Will have to give more effort to improve their performance in university exam.

(XIV) Recommendations/Suggestions for improvement by faculty

- To make it more interesting, syllabus of chemistry should be oriented towards more applications in engineering.
- For most of the lab classes (except expt no. 4 and 7) there is no theory part. So there is a gap between theory and lab class, which needs to be addressed by the University.

Broad Objectives of the chapter/topic are:

- 1. They are able to explain to analyze, investigate and evaluate.
- 2. They are able to judge how to apply theory.

Once the student has completed this topic/ chapter he/she will be able to answer following questions/perform the following activities with Levels of Bloom's Taxonomy:

Discussion most of the university questions in last 5 years.

Title: Discussion on University OP(Last 5 Years) Date: 21st & 22nd October,2016, Day: Friday and Saturday CONTENTS

Last 5 years university question paper.

Topic/Unit/Chapter Objectives: we provide discussion on university question paper so that our students can clear their concept and their answers can be to the point.

Broad Objectives of the chapter/topic are:

- 1. They are able to explain to analyze, investigate and evaluate.
- 2. They are able to judge how to apply theory.

Once the student has completed this topic/ chapter he/she will be able to answer following questions/perform the following activities with Levels of Bloom's Taxonomy:

Discussion most of the university questions in last 5 years.

1) Teaching Strategy/Method (describe instructional methods, usage of ICT, efficient and engaging instructions and display the best practices on institutional website)

- 1) Taking interactive classes through different examples.
- 2) Conducting Question answer session at the end of the class.
- 3) Real life application for better understanding.

m) Strategy to support weak students

- **1)** To engage the weak students in habit of studying, I give them some easy questions in regular basis.
- **2)** Some weak students also have the problem of forgetting what they have learnt. In my class I always give some tips on how to recall and how to write systematically.
- **3)** Weak students need special attention even after college hours. I always give some extra hours to weak students.

n) Strategy to encourage bright students

- **1)** Have an extra challenge ready that allows the student to go deeper into the subject, learn a little more, or apply a skill he has just learned in a new way.
- 2) Some students are engaged with the final year students for their final projects.

o) Efforts to keep students engaged

- **1)** Regular basis Home Work.
- **2)** 5-10 minutes spent in an every class for question answer session.
- **3)** Quiz on regular basis.
- **4)** Some technical assignments are given group wise.

p) Analysis of Students performance in the course (internal) (labs, seminars, tests, assignments, quiz, exam etc)

Comments:

- 70% students have attained the set target of 60% marks for CO1
- 78% students have attained the set target of 60% marks for CO2
- 67% students have attained the set target of 60% marks for CO3
- 67% students have attained the set target of 60% marks for CO4
- 66% students have attained the set target of 60% marks for CO5
- 64% students have attained the set target of 60% marks for CO6

q) Analysis of Students performance in the course (university results)

	Target Course Outcome%	TOTAL STUDENTS	TOTAL STUDENT WHO ATTAINED OUTCOME	% STUDENTS WHO ATTAINED THE OUTCOME
University Result	60%	41	41	100%

> 100% students have attained the set target of 60% marks for University Exams.

r) Analysis of Student Feed Back

s) Teacher Self Assessment (at the completion of course)

From the analysis of the results obtained it can be seen that set targets for the course outcome have been achieved successfully by the students. Since this subject is a pre-requisite for Design & Analysis of Algorithm in 5th semester, more emphasis must be given for NP completeness.

t) Recommendations/Suggestions for improvement by faculty

- More emphasis should be given to clear the concepts of NP Completeness.
- Tutorials must be incorporated in the syllabus.
- Increase the total contact hours for theory to 40 hrs, with 4L per week.

- Early submissions are allowed.

- Late submission policy: **No late submissions will be allowed** on any assignment. However, earlier submissions are allowed at any time before due.

<u>Assignment – II</u> (4 X 5 = 20)

- I. By applying the master theorem solve the following recurrences. For the base cases, assume that T(1) = O(1).
 - 1) T (N) = $25T (N/5) + N^{2.1}$
 - 2) T (N) = $25T (N/5) + N^{1.5}$
 - 3) T (N) = $25T (N/5) + N^2$
- II. Solve the following recurrence by successive substitutions or by induction. For the base cases, assume that T(1) = O(1).

 $T(N) \le 25T(N/5) + N^2 \log N.$

III. The ELEMENT DISTINCTNESS problem consists of testing whether a given set of N numbers

have no duplicates. Design an O(N log N) step comparison-based algorithm for this problem.

IV. In the selection problem (finding the K^{TH} smallest element), if we group the N elements into N/3 groups each of 3 elements and make appropriate changes to the algorithm, derive the speed of the resulting algorithm. Repeat it when each group consists of 7 elements.

Siliguri Institute of Technology

Computer Science & Engineering Department Year: 3RD Semester: 1ST Section: A Marks: 20

Paper Name:Design & Analysis of AlgorithmPaper Code:CS 501Submission Date:25th November, 2015Assignment policy:

- Assignments must be submitted **in class** as hardcopy (A4 sheet) on the due date mentioned in the assignment
- Early submissions are allowed.
- All assignments must be done individually. Anyone cheating will receive a zero for that assignment.
- Late submission policy: **No late submissions will be allowed** on any assignment. However, earlier submissions are allowed at any time before due.

<u>Assignment – III</u> (4 X 5 = 20)

I. Design a dynamic programming algorithm for the following problem:

Given a sequence $A_1 *_1 A_2 *_2 \cdots A_{N-1} *_{N-1} A_N$, in which each A_I is a positive integer and each $*_I$ is '+' or '-', compute a parenthesization of the expression such that the resulting value is the maximum possible. It suffices to compute the resulting value instead of the parenthesization. Estimate its speed.

For example, if the given sequence is 3 - 4 -5, ((3-4)-5) results in -6 while (3-(4-5)) results in 4. The second parenthesization results in the maximum possible value, and the output is 4.

II. Let A be an $M \times N$ array of numbers. In phase 1, we sort the rows and then in phase 2, we sort the columns. Prove that after both the phases are completed, the rows remain in sorted order.

III. Let S_1, S_2, \dots, S_M be nonempty subsets of $\{1, 2, \dots, N\}$, and let the total number of elements in all the $S_I S$ be N. Design an O(N) step algorithm for sorting the $S_I S$.

IV. In the standard Heap Sort, given any N numbers A_1 , A_2 , \cdots , A_N , we first arranged them into a complete binary tree and then satisfied the heap property in the order A_N , A_{N-1} , \cdots , A_1 . If we

want to heapify in the order A_1, A_2, \cdots, A_N , describe an appropriate algorithm and estimate its speed. (In this algorithm, for any $I \geq 1$, after a heap is constructed for A_1, A_2, \cdots, A_I , the next number A_{I+1} is brought into the heap in a bottom-up fashion.)

Discussion on University QP (Last 5 Years) Date: 24.4.17, 25.04.17 Date: 24.4.17, 25.04.17 CONTENTS

Last 5 years university question paper.

Topic/Unit/Chapter Objectives: we provide discussion on university question paper so that our students can clear their concept and their answers can be to the point.

Broad Objectives of the chapter/topic are:

- 1. They are able to explain to analyze, investigate and evaluate.
- 2. They are able to judge how to apply theory.

Once the student has completed this topic/ chapter he/she will be able to answer following questions/perform the following activities with Levels of Bloom's Taxonomy:

Discussion most of the university questions in last 5 years.

1) Teaching Strategy/Method (describe instructional methods, usage of ICT, efficient and engaging instructions and display the best practices on institutional website)

- 1) Taking interactive classes through different examples.
- 2) Conducting Question answer session at the end of the class.
- 3) Real life application for better understanding.

m) Strategy to support weak students

47

1) To engage the weak students in habit of studying, I give them some easy questions in regular basis.

- **2)** Some weak students also have the problem of forgetting what they have learnt. In my class I always give some tips on how to recall and how to write systematically.
- **3)** Weak students need special attention even after college hours. I always give some extra hours to weak students.

n) Strategy to encourage bright students

- **1)** Have an extra challenge ready that allows the student to go deeper into the subject, learn a little more, or apply a skill he has just learned in a new way.
- 2) Some students are engaged with the final year students for their final projects.

o) Efforts to keep students engaged

- **1)** Regular basis Home Work.
- 2) 5-10 minutes spent in an every class for question answer session.
- 3) Quiz on regular basis.
- 4) Some technical assignments are given group wise.
- p) Analysis of Students performance in the course (internal) (labs, seminars, tests, assignments, quiz, exam etc)

Comments:

- 70% students have attained the set target of 60% marks for CO1
- 61% students have attained the set target of 60% marks for CO2
- 68% students have attained the set target of 60% marks for CO3
- 65% students have attained the set target of 60% marks for CO4
- 67% students have attained the set target of 60% marks for CO5

q) Analysis of Students performance in the course (university results)

	Target Course Outcome%	TOTAL STUDENTS	TOTAL STUDENT WHO ATTAINED OUTCOME	% STUDENTS WHO ATTAINED THE OUTCOME
University Result	60%	41	35	85%

> 85% students have attained the set target of 60% marks for University Exams.

r) Analysis of Student Feed Back

s) Teacher Self Assessment (at the completion of course)

From the analysis of the results obtained it can be seen that set targets for the course outcome have been achieved partially by the students. More emphasis should be given for Data Models, Relational Algebra and Calculus and Query Optimization Techniques.

t) Recommendations/Suggestions for improvement by faculty

- More emphasis should be given to clear the concepts of ERD concepts and Relational Algebra and Calculus.
- Tutorials must be incorporated in the syllabus.
- Increase the total contact hours for theory to 40 hrs, with 4L per week.

Paper Name: Database Management System Paper Code: CS 601

FM: 60 **Submission Date:** 18/03/2016

(5)

- 1. Construct an E-R diagram for a Car-insurance company that has a set of customers, each of whom owns one or more cars. Each car has associated with it zero to any number of recorded accidents. Convert the E-R schema into Relational schema. (5)
- 2. Consider following relation schemas (7+7+7) Sailors(<u>sid</u>, sname, rating, age) Boats(<u>bid</u>, bname, color) Reserves(<u>sid</u>, <u>bid</u>, day) Write down following queries in RA, TRC and SQL expressions
 - a) Find all sailors with rating above 7
 - b) Find names and ages of sailors with rating above 7
 - c) Find the sailor name, boat id and reservation date for each reservation
 - d) Find the names of the sailors who have reserved boat number 103.
 - e) Find the names of the sailors who have reserved a red boat.
 - f) Find the names of the sailors who have reserved at least two boats.
 - g) Find the names of the sailors who have reserved all boats.
- 3. Consider following two relation schemas:

Employee (eno, ename, job, hiredate, managerno, salary, comm., dno) Dept (dno, dname, location)

Solve the following queries using SQL:

- i) List the name of the employees with their immediate higher authority.
- ii) List the name of the employee whose name either starts or ends with "S".
- iii) List the department name and the total salary payable in each department.
- iv) List out the employees who earn more than the average salary of their department.
- v) List the names of the employees who are working more than thirty years in the company.
- 4. Consider a relation schema R(A, B, C, D). For each of the following sets of FDs, assuming those are the only dependencies that hold on R, do the following: 5x3
 - i) Identify the candidate key(s) for *R*.
 - ii) Identify the best normal form that *R* satisfies (1NF, 2NF, 3NF, or BCNF).
 - iii) If R is not in BCNF, decompose it into a set of BCNF relations that preserve the dependencies.

1. $C \rightarrow D, C \rightarrow A, B \rightarrow C$ 2. $B \rightarrow C, D \rightarrow A$ 3. $ABC \rightarrow D, D \rightarrow A$ 4. $A \rightarrow B, BC \rightarrow D, A \rightarrow C$ 5. $AB \rightarrow C, AB \rightarrow D, C \rightarrow A, D \rightarrow B$

- 5. Prove that any relation schema with two attributes is in BCNF. (4)
- 6. Prove that every 3NF schema is in 2NF. (4)
- 7. Prove that a relation with primary key of single attribute is always in 2NF. (3)
- 8. Suppose schema R = (A,B,C,D,E) with F = { $A \rightarrow BC$, $CD \rightarrow E$, $B \rightarrow D$, $E \rightarrow A$ } is decomposed into (A, B, C) and (A,D,E). Show that this decomposition is lossless-join decomposition. (3)

(x) Teaching Strategy/Method

- Learning by memorizing and understanding
- Solving problem
- Interactive sessions

(xa) Strategy to support weak students

• Reviewing student attendance and counseling students about attending classes

- Providing extra assignments to students with poor attendance.
- Taking more care of those who understand poorly
- In brainstorming small group (week student + bright student).

(xb) Strategy to encourage bright students

- Instruct them to work ahead to problems of skills that they do not know.
- Teaching research skills for accessing information; higher level thinking skills for processing it; creative thinking and problem-solving skills for flexibility in approach and generation of information; and communication skills for sharing it.

(xc) Efforts to keep students engaged

- Asking students to write what they have learned, questions they may have, or by discussing the content with a fellow student.
- Allow students 5-7 seconds of 'think time' when asking a question. At the end of the time draw a random name to answer the question.
- At the end of a lesson allow students time to share their findings with a peer.

(xi) Analysis of Students performance in the course (internal) (labs, tests, assignments, quiz, exam)

- 74% students have attained the set target of 60% marks for CO1
- 60% students have attained the set target of 60% marks for CO2
- 74% students have attained the set target of 60% marks for CO3
- 68% students have attained the set target of 60% marks for CO4
- 77% students have attained the set target of 60% marks for CO5

(xii) Analysis of Students performance in the course (university results)

	Target Course Outcome%	TOTAL STUDENTS	TOTAL STUDENT WHO ATTAINED OUTCOME	% STUDENTS WHO ATTAINED THE OUTCOME
University	60%	16	16	100%

Overall Course Attainment Target = 70% of university and 30% of the internal exam is **Attainment Level 3**

(xiii) Teacher Self-Assessment (at the completion of course)

The graphical analysis of the results show that all of the course outcome have been achieved successfully by the students.

(xiv) Recommendations/Suggestions for improvement by faculty

Tutorials must be incorporated in the syllabus.

Q1. Construct an E-R diagram for a company database that has to be designed to keep track of employees, departments and projects. The database should also be able to keep track of dependents of each employee for medical purpose. You can make <u>appropriate assumptions</u> to make the specification complete.

Convert E-R schema into relational schemas.

Describe the three-schema architecture. Why do we need mappings between schema levels? What is the difference between logical data independence and physical data independence? Which one is harder to achieve? Why?

PAPER DESCRIPTION: Design of reinforced concrete structures is an introductory design course in civil engineering. In this course, basic elements governed by bending, shear, axial forces or combination of them are identified and are considered as building blocks of the whole structure. Different methods of design will be briefly described before introducing the limit states of collapse and serviceability. The designs of elements such as beams, slabs, columns, stairs and foundations will be done as per IS 456:2000.
